Psocoptera are an order of insects that are commonly known as booklice, barklice or barkflies. They first appeared in the Permian period, – million years Classification - Suborder Trogiomorpha - Suborder Troctomorpha.Psocoptera. Psocids / Barklice / Booklice. The name Psocoptera is derived from the Greek "psokos" meaning rubbed or gnawed and "ptera". Although they are called lice, the Psocoptera are free-living insects, not parasites. The scientific name comes from the Greek psocus (to grind) and pteron (wing). See Tree of Life for the current concept of relationships among these groups. However, Phthiraptera and Psocoptera are still sometimes treated. The Psocoptera, or booklice, are a small order of insects with a characteristic appearance due to their large rounded head that bulges out at the front (due to a .Etymology: Psocoptera comes from the Greek words psocos, which means gnawed, and ptera, which means wings. This refers to two different characteristics. Fast facts about Psocoptera (book lice, bark lice, dust lice). Minute (less than 6 mm) though a few are as large as 10 mm, soft-bodied, winged and wingless. Description: Psocids are small soft-bodied insects, most of which are less than 1/ 4 inch .Discover Life's page about the biology, natural history, ecology, identification and distribution of Psocoptera - Barklice, Booklice, Psocids -- Discover Life. book lice, psocids, and trogiids (Order Psocoptera) Charles Olsen. bark lice (family Psocidae) Erich G. Vallery. bark lice (family Psocidae) Erich G. Vallery. Psocoptera (commonly called psocids) are one of the smaller orders of paraneopteran insects. Many species are arboreal, but a few are more usually found on. Order Psocoptera · Psocoptera: pictures (4). Superfamily Amphientomoidea. Family Archipsocidae. Superfamily Asiopsocoidea. Family Bryopsocidae. Superfamily. Order Psocoptera. COMMON NAMES: BOOKLICE, BARKLICE OR PSOCIDS. The Psocoptera are tiny insects that have either four wings, two. This chapter focuses on the insect order, psocoptera. This order constitutes of neopterous, exopterygote insects commonly called psocids, barklice, or booklice.
